Contents

1 Evolution of Mobile Networks —— 1
1.1 Connection Concepts and Routing Principles —— 4
1.2 Evolution of 2G/3G Mobile Networks —— 10
1.3 NGN (Next Generation Network) —— 15
1.4 VoIP (Voice over IP) and SIP (Session Initiation Protocol) —— 19

2 3G/4G Mobile Networks and NGN (Next Generation Networks) —— 30
2.1 3GPP Releases (3rd Generation Partnership Project) —— 30
2.2 IMS (IP Multimedia Subsystem) and NGN —— 32
2.3 H.248/Megaco Protocol —— 40
2.4 Diameter Protocol —— 46
2.5 SAE (System Architecture Evolution) and LTE (Long Term Evolution) —— 58
2.6 VoLTE (Voice over LTE) —— 61

3 Future Networks —— 65
3.1 NFV (Network Functions Virtualization) and MEC (Multi-access Edge Computing) —— 65
3.2 SDN (Software Defined Networking) and SFC (Service Function Chaining) —— 74
3.3 Future Networks Concept —— 95

4 5G Use Cases and Requirements —— 99
4.1 5G Use Cases and Usage Scenarios —— 99
4.2 Application Areas for 5G —— 107
4.3 5G Requirements —— 112

5 5G Standardization and Regulation —— 121
5.1 Frequencies —— 121
5.2 Standardization —— 125
5.3 Regulation —— 127

6 5G Networks at a Glance —— 133
6.1 Design Principles —— 133
6.2 Features and Functions —— 135
6.3 5G Network Architecture —— 142

7 5G Access Networks —— 145
7.1 Radio Transmission Technology —— 145

7.2 RAN (Radio Access Network) — 157
7.3 Open-RAN (O-RAN) — 163

8 5G Core Network — 167
8.1 Basic System Architecture and Protocols — 168
8.2 Core Network Functions — 178
8.3 Service Based Architecture (SBA) — 182
8.4 Network Slicing — 195

9 5G System — 204
9.1 4G/5G Migration — 206
9.2 5G and IMS — 209
9.3 Access Networks and Fixed Mobile Convergence (FMC) — 211
9.4 5G and IoT — 219
9.5 5G Campus Networks — 223
9.6 5G System in an Overall View — 226

10 5G and Security — 230
10.1 Security for the Communication Network — 234
10.2 Security in the Cloud Infrastructure — 236
10.3 3GPP Security Architecture for 5G — 242

11 5G and Environment — 249
11.1 New Issues through 5G Technology — 249
11.2 Electromagnetic Radiation and Health — 250
11.3 Exposure and Limit Values — 255
11.4 Influences of the Network Architecture — 257
11.5 Energy Requirements, Raw Materials, and Sustainability — 259

12 Future Developments — 267
12.1 Further Development of 5G — 267
12.2 Network 2030 — 271
12.3 Research, Regulation, and Standardization on 6G — 278
12.4 6G Use Cases and Usage Scenarios — 285
12.5 6G Requirements — 292
12.6 Technologies for 6G and Network Architectures — 296

Abbreviations — 307

References — 323

Index — 335
